

# FPS Announces May 2025 Sinking Fund Renewal

Dear Fremont Public Schools Community,

In May 2025, Fremont Public Schools will seek community support for the renewal of our sinking fund. The renewal will help us make critical improvements and upgrades to our campus facilities.

This renewal would support essential improvements such as renovations to aging buildings, long-needed technology upgrades, and, potentially, new construction or building replacement projects.

This fall, FPS contracted renowned architectural engineering firm [Kingscott Associates](#) to conduct a site assessment to identify areas of greatest need. In the new year, they will share their recommendations and design mockups of proposed new construction facilities.

Operational improvements were highlighted as one of the highest priorities in our district's [Strategic Plan](#), and renewing the sinking fund is a key first-year objective toward addressing those needs. This investment is crucial to ensuring that our schools are equipped to serve students, staff, and families well into the future.

It's important to note that this renewal will not raise millage rates. Instead, it will maintain the existing rate, allowing us to continue our work in a steady, sustainable way to support school maintenance and growth.

As we approach this important ballot initiative, we are committed to transparency and providing ongoing communication about this plan and process. You can expect regular updates via our website, social media pages, and Packer Post newsletter. We will also be hosting community events, informational forums, and Coffee Chats to discuss the renewal in detail.

We encourage everyone in our community to reach out with questions, attend events, and learn more about these important efforts. We believe this renewal will benefit all of Fremont, supporting the future of our schools and greater community.

Thank you for your continued support and collaboration.

Sincerely,

Brad Reyburn
